# Invitación al Seminario «Modos de ver un planeta que muere»

26 abr 2019

Visual Evidence, Ecocide, and the political aesthetics of environmental memory a cargo de Hannah Meszaros Martin, Ph.D> Centre for Research Architecture, Forensic Architecture, Goldsmiths University of London.

Del 22 de mayo al 27 de mayo de 2019

Escuela de Arquitectura Universidad de Costa Rica

## Presentation

From Brazil to Vietnam, this workshop will discuss how different forms of legal activism, indigenous and anti-colonial struggles, and aesthetic practices have attempted to document and denounce the entanglement of environmental and political violence at different scales.

The aim of the seminar is to provide students with a robust grounding in both the theory and method that has been developed within the context of the Centre for Research Architecture and Forensic Architecture. While these sessions are introductory in nature, we will have the opportunity to discuss a wide variety of current academic research, artistic practice, and political action that addresses the environment. Students will be familiarized with the methodologies employed by Forensic Architecture, examine key critical texts, and learn practical methods of spatial research that can be easily used in the future research projects that the students may undertake.

## Programa

1. Introduction. Wednesday May 22nd, 17.00-19.00h Auditorio Escuela de Arquitectura
2. Forms and terminologies of violence. Thursday May 23th, 17.00-19.00h Sala 4 Escuela de Antropología, Tercer Piso, Facultad de Ciencias Sociales
3. Forensic Architecture. Friday May 24th, 17.00-19.00h Auditorio Escuela de Arquitectura
4. Field trip to pineapple plantation. (UCR bus) Saturday May 25th, 6.00-18.00h
5. Participatory mapping strategies. Monday May 27th, 10.00-12.00h Escuela de Arquitectura

## Learning outcomes

- Students will gain an understanding of the current debate in academia around Anthropocene theory through a variety of texts.
- The student will demonstrate an understanding of discourses around landscape, power and technology.
- The student will demonstrate an understanding of discourses around art practices that explore politics of earth, soil, and water.

- Students will gain experience in participatory mapping techniques.

## ¡Participá!

La inscripción gratuita está abierta para estudiantes y docentes en grado y posgrado de la Escuela de Arquitectura-UCR y de las áreas de urbanismo, geografía ambiental, paisajismo, arte y ciencias sociales de la Universidad de Costa Rica.
